

"The Secret To Getting Listed In Google In Under 24 Hours - Guaranteed"

You may or may not have heard people claim they can get listed in Google in only 1 day. It seems that nearly 100% of the **people you run across in forums act like in order to get indexed by Google in 24 hours is some miracle feat** that can only be accomplished by doing some "top secret" marketing tactic or advanced optimization strategy,

Well, the truth of the matter is...

Getting listed in Google in under a day is quite easy!

First let's talk about what NOT to do. This drives me absolutely crazy when I see people doing this, and is actually what I did at one time as well. The following URL probably looks familiar to you:

<http://www.google.com/addurl.html>

The image shows a screenshot of the Google 'Add your URL to Google' submission form. The form is titled 'Add your URL to Google' and is located on the Google homepage. It includes a search bar, a 'Submit Your Site' button, and a section for submitting a URL. The form contains the following text:

Share your place on the net with us.

We add and update new sites to our index each time we crawl the web, and we invite you to submit your URL here. We do not add all submitted URLs to our index, and we cannot make any predictions or guarantees about when or if they will appear.

Please enter your full URL, including the `http://` prefix. For example: `http://www.google.com/`. You may also add comments or keywords that describe the content of your page. These are used only for our information and do not affect how your page is indexed or used by Google.

Please note: Only the top-level page from a host is necessary; you do not need to submit each individual page. Our crawler, Googlebot, will be able to find the rest. Google updates its index on a regular basis, so updated or outdated link submissions are not necessary. Dead links will fade out of our index on our next crawl when we update our entire index.

URL:

Comments:

Optional: To help us distinguish between sites submitted by individuals and those automatically entered by software robots, please type the squiggly letters shown here into the box below.

Other Options:

- Instant Ads on Google**
Create your own targeted ads using [AdWords](#). With credit card payment, you can see your ad on Google today.
- Google AdSense for Web Publishers**
Publish ads that match your content, help visitors find related products and services – and maximize your ad revenue. [Learn more.](#)
- Google-Quality Site Search**
Reduce support costs, keep users on your site longer, and turn browsers into buyers with the [Google Search Appliance](#) or [Google Mini](#).

This is Google's actual website submission form. They state that you can use this form to submit your website to their index of websites and it can take up to 6 weeks for your website to be placed into their index.

I don't know about you, but 4 weeks is a heck of a long time to just wait for your website to be placed in their index rotation, let alone get a top ranking!

Never Use The Google Submission Form!

You should never use this form, or any other of the top search engine's submission forms. These search engines include Yahoo, MSN, Altavista, Alltheweb.

So, how do you get your website indexed within 24 hours?

Let's stick with our weight loss website for now, and I will take you through the steps you'll need to do to get indexed by Google in under 24 hours, guaranteed.

- Go to Google and enter the broadest keyword you can think of that's related to your website. In our example, it will be "weight loss". Once you've done this, you'll see a list of Google results.
- Browse through each website and pay particular attention to the Google Page Rank of the website.

Note: Google Page Rank is measured by the number of websites and the "importance" of those websites that link to your website. In general, the more websites that link to your website, the higher your Page Rank will be.

- So, as you're looking at these top ranked websites for the search term "weight loss", you should try to find websites with a Page Rank of 6 or higher.

- Once you've found several websites like this, you should check and see whether or not they have links pages. Usually you'll see links from their index page that say (resources, links, related sites, etc.) Now, you need to search their website for their contact information.
- Once you find their contact information you should send them an email asking if they will link to your website in return for you linking back to their website. If you do this correctly and professionally, they will respond and will place a link on their website to yours.

If you can manage to get **1 PR6 website** to link to your website, you will be indexed by Google in **under 3 days**. If you can get **1 PR7 website** to link to you, then you will be in Google's index **in under 24 hours!**

Sometimes persuading the higher page rank websites is pretty tough, so there's another option you can pursue and that is ...

Purchasing Text Links - But For Only 1 Month

Purchasing links from high Page Rank websites. The easiest and fastest way to do this is to visit 1 of the many link purchasing websites. Here are a few of the better ones:

1. <http://www.textlinkbrokers.com> (I personally work with them and they are very good.)
2. <http://www.text-link-ads.com>
3. <http://www.linkadage.com>

Many times you can purchase 1 PR7 link for a 1 month time period for, say, \$150. After the month is up, there is no need to renew because you are already in Google's index! So, basically by paying \$150 you can be indexed by Google within 24 hours, with no work on your part.

There is a catch. During this month period **there is 1 thing you MUST do or spending \$150 will be a complete waste** and you won't see any benefit from spending your money.

So what is this 1 thing?

Stay tuned to find out tomorrow!

All the best,

Brad Callen
